**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 31 July 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7-31-2009 has been entered.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 40-47, 49 and 50 are rejected under 35 U.S.C. 102(b) as being anticipated by Letendre et al. (US 6,214,036).

Letendre discloses a medical device delivery system (Figures 1-5) comprising an inner shaft 60, an outer shaft 50 disposed over the inner shaft 60, a self expanding-stent 10 disposed around the inner shaft 60 (at least a portion of the stent is disposed around the inner shaft 60 as seen in Figure 3) between the inner shaft 60 and the outer shaft 50, and the inner shaft has a bumper 52 at its distal end comprising a bumper retainer

(in Figure 2, the outwardly projecting elements at tip of inner shaft 60 disposed between recesses 54 comprise bumper retainers). The bumper retainer extends outwardly from the outer perimeter of the inner shaft 60, and thus has an outer diameter greater than the outer diameter of the inner shaft. (See Figure 3) There is a retaining member (two of the legs 20 define a single retaining member) the extending from the stent body 12, the retaining member being releasably coupled to the bumper retainer. The retaining member includes a partially open cell 26 of the stent. The retaining member comprises a nickel-titanium alloy. (Col. 7, Lines 4-15) Said alloys are at least somewhat radiopaque. The retaining member includes two paddles 20, 28 wherein each of the paddles includes a leg portion 20 and a head portion 28. The bumper retainer interdigitates with the retaining member such that they are detachably coupled.

### ***Response to Arguments***

Applicant's arguments filed 7-31-2009 have been fully considered but they are not persuasive. Applicant argues that Letendre fails to disclose a bumper retainer having an outer diameter greater than an outer diameter of the inner shaft. In response, Examiner points to Figure 2 of Letendre, showing the inner shaft 60 having a narrowed portion at its distal tip, wherein recessed portions 54 are alternately disposed between outwardly projecting bumper retainers. At this narrowed portion, the outer diameter of the bumper retainers is greater than the outer diameter of the inner shaft at recessed portions 54.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Blatt whose telephone number is (571)272-9735. The examiner can normally be reached on Monday-Friday, 9:00 AM-6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Todd Manahan can be reached on 571-272-4713. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
